

ABC Order Worksheets

FILL IT · ORDER IT · GLUE IT

39 pages · 7 formats · 23 pictured letters

One complete kit for the order of the alphabet: fill in the strip, say what comes next, and put pictures and words in ABC order — pencil work on every page but three, and those three cut in straight lines.

THREE STEPS

- 1 **Say the alphabet with the chart**
Page 6 is the one student page with every letter and a picture on it. Point to a picture, say its word, say its letter. Do this together before a child's first ordering page.
- 2 **Start where the child can win**
Three levels, marked by dots and never by color: 1 dot has the most help (a copy strip, the letters printed), 3 dots has the least. The chart below says which page for which child.
- 3 **Check it, record it, send it home**
Answer keys are pages 28–30. Date each page on the tracker (page 31), roll the group up on page 32, and send the home page (34). A filled example is on page 35.

How this is different from Alphabet Matching

The Alphabet Letter Recognition and Matching pack from this store is about telling letters apart by sight. Nothing here asks a child to match a letter; the skill is the *order* of the alphabet. Page 4 shows what each format asks.

How to fill this in

Date a page the day the child finishes it. **Right** is how many of the **Of** column are correct, checked against the answer keys on pages 28–30. A blank means not tried yet, never wrong. Filled example: page 35.

Maya R. is invented; nothing on this page describes a real student. The blank tracker is on page 31.

How to read it

Maya R. has finished **9 of 21** pages (Finish the Alphabet 4 of 6, What Comes Next 2 of 3, ABC Order with pictures 2 of 5, Cut and Glue 1 of 3). Across those pages she got **66 of 74** right; 4 pages were all right. The next page on the tracker is page 11 (Finish the Alphabet, capitals). Every number comes from the table above.

The family note this tracker would produce

"This month Maya R. finished the alphabet strip with capitals and small letters at 1 and 2 dots, and started putting pictures in ABC order. She got 66 of 74 right on the pages she finished." — every fact in it is a row of the table above.

THANK YOU FOR USING THIS RESOURCE

Everything here was built for the teacher who has a table of children who each need a different amount of support with the order of the alphabet. If this helped, leaving feedback on TPT helps other teachers find it.
