

Addition and Subtraction Word Problems

WITHIN 100 • JOIN • SEPARATE

29 pages • 6 formats • 52 word problems

Every page opens with a short word problem to read — joining, separating, comparing, finding a missing part, or a full story with work space — and every sum or difference stays within 100. Nothing here is a timed probe; this is untimed practice.

THREE STEPS

- 1 **Pick the format**
Join Problems (pages 6–7), Separate Problems (pages 8–9), Compare Problems (pages 10–11), Missing Addend Problems (pages 12–13), Mixed Story Problems (pages 14–15), or Cut and Glue (pages 16–17). The contents page (5) gives every page number.
- 2 **Work the page, check the answer**
Every page has its own name/date line and a “My work” space. The three answer key pages (18–20) are generated from the same numbers the worksheets use.
- 3 **Record it, send it home**
Score each format on the tracker (page 21), see it as a bar graph on the snapshot (page 22), roll the group up on page 23, and send the family update (page 25) and home practice page (page 26).

WHICH PAGE, WHEN

WHEN...	USE...
Adding on to find a new total	Join Problems, page 6–7
Taking away to find what is left	Separate Problems, page 8–9
Comparing two totals	Compare Problems, page 10–11
Finding the missing part of a story	Missing Addend Problems, page 12–13
Reading a full word problem and showing work	Mixed Story Problems, page 14–15
Better with cutting and gluing	Cut and Glue, page 16–17

Everything inside (29 pages)

- 8 Join Problems, 2 pages
- 8 Separate Problems, 2 pages
- 8 Compare Problems, 2 pages
- 8 Missing Addend Problems, 2 pages
- 8 Mixed Story Problems plus 1 worked example, 2 pages
- 12 Cut and Glue pieces, 2 pages
- 3 answer keys, 1 tracker, 1 snapshot, 1 class grid
- 1 family update, 1 home page, 1 filled example, 1 phrase bank, 1 binder cover with tabs

Every value hand-computed, every answer checked

Every answer in this file is the sum or difference of the numbers in the story, checked by an automatic test every time the file is built — a wrong hand computation fails the build instead of shipping.

MY NAME:

DATE

Read the story. Add to find out how many there are now. Write the answer.

1

Mia has 38 marbles. Mia finds 19 more marbles. How many marbles does Mia have now?

My work

2

Jalen has 46 crayons. Jalen finds 27 more crayons. How many crayons does Jalen have now?

My work

3

Theo has 59 shells. Theo finds 36 more shells. How many shells does Theo have now?

My work

4

Aria has 24 buttons. Aria finds 58 more buttons. How many buttons does Aria have now?

My work

MY NAME:

DATE

Read the story. Subtract to find out how many are left. Write the answer.

1

Carlos has 85 pretzels. Carlos eats 27 pretzels. How many pretzels does Carlos have left?

My work

2

Nina has 92 pencils. Nina gives away 48 pencils. How many pencils does Nina have left?

My work

3

Owen has 73 cards. Owen trades away 36 cards. How many cards does Owen have left?

My work

4

Yusuf has 61 balloons. Yusuf pops 19 balloons. How many balloons does Yusuf have left?

My work

MY NAME:

DATE

Read the story. Compare the two totals. Write how many more.

1

Mara has 92 stickers. Kai has 47 stickers.
How many more stickers does Mara have than Kai?

My work

2

Devon has 68 cards. Suri has 29 cards. How
many more cards does Devon have than Suri?

My work

3

Talia has 85 shells. Enzo has 36 shells. How
many more shells does Talia have than Enzo?

My work

4

Omar has 74 blocks. Wren has 18 blocks. How
many more blocks does Omar have than
Wren?

My work

MISSING ADDEND
PROBLEMS, SET A

MY NAME:

DATE

Read the story. Figure out the missing number. Write the answer.

1

Lina has 38 stickers. Lina gets some more stickers. Now Lina has 95 stickers. How many stickers did Lina get?

My work

2

Mateo has 45 cards. Mateo gets some more cards. Now Mateo has 83 cards. How many cards did Mateo get?

My work

3

Sana has 29 shells. Sana gets some more shells. Now Sana has 92 shells. How many shells did Sana get?

My work

4

Boone has 54 blocks. Boone gets some more blocks. Now Boone has 90 blocks. How many blocks did Boone get?

My work

MIXED STORY PROBLEMS, SET A

MY NAME:

DATE

Read the story. Show your work. Write the answer.

WORKED EXAMPLE

Example: Malik has 48 stickers. He finds 37 more stickers while picking apples in the orchard. How many stickers does Malik have now?

$$48 + 37 = 85$$

1

Priya has 96 stickers. Priya gives away 18 stickers to a friend. How many stickers does Priya have left?

My work

2

Jovan has 97 stickers. Jovan gives away 70 stickers to a classmate. How many stickers does Jovan have left?

My work

3

Amara has 83 stickers. Amara gives away 10 stickers to a neighbor. How many stickers does Amara have left?

My work

4

Diego has 19 stickers. Diego finds 75 more stickers while finding seashells on the beach. How many stickers does Diego have now?

STUDENT

TEACHER

DATE

SKILL AREA	ITEMS	SCORE	NOTES
Join Problems	8		
Separate Problems	8		
Compare Problems	8		
Missing Addend Problems	8		
Mixed Story Problems	8		
Cut and Glue	12		
Total	52		

How to score it

Write the number correct in Score. 52 items in all across six word-problem formats. A filled example is on page 24, and the same six scores become a bar graph on the snapshot, page 22.

THIS STUDENT IS WORKING ON (JOINING, SEPARATING, COMPARING, MISSING ADDEND, FULL WORD PROBLEMS...)

When to re-score

Re-score the same six formats at two or three points in the term and carry each score to the snapshot (page 22) and the class grid (page 23) — one blank tracker per check, never erased over an earlier score.

DEVON'S TRACKER, INVENTED

Devon T. is invented; nothing on this page describes a real student. The blank tracker is on page 21.

STUDENT

TEACHER

Devon T. (an invented student)

Ms. Alvarez (invented)

SKILL AREA	ITEMS	SCORE	NOTES
Join Problems	8	7	
Separate Problems	8	6	
Compare Problems	8	7	
Missing Addend Problems	8	4	
Mixed Story Problems	8	5	
Cut and Glue	12	9	
Total	52	38	

How to read it

Devon T. scored **38 of 52** items across all six word-problem formats. The lowest scores are on Join Problems (7 of 8), Separate Problems (6 of 8), Compare Problems (7 of 8), Missing Addend Problems (4 of 8), Mixed Story Problems (5 of 8), Cut and Glue (9 of 12). Every number here comes from the table above.

Two things the Notes column is for

- What you saw, in plain words: counted up from the smaller number one at a time instead of regrouping, mixed up which total was bigger on a Compare item, needed a model for Missing Addend.
- What you did about it: went back to Join Problems before trying Missing Addend, or moved on to the next format. Never a conclusion about the student — that is the team meeting's job.

The same six scores on the snapshot graph (page 22)

Devon T.'s bars would look like this today:

Join Problems		7/8
Separate Problems		6/8
Compare Problems		7/8
Missing Addend Problems		4/8
Mixed Story Problems		5/8
Cut and Glue		9/12

THANK YOU FOR USING THIS RESOURCE

Everything here was built for the teacher who has a table of children who each need a different amount of support turning a word problem into an answer. If this helped, leaving feedback on TPT helps other teachers find it.

Leave a review and earn credits

Go to **My Purchases** on TPT and click **Provide Feedback**. You earn credits toward future purchases, and honest feedback tells me exactly what to build next. If something is missing or wrong, please use the **Ask a Question** tab first — I will fix it and send you the update free.

WHAT'S NEXT FROM THIS STORE

Addition and Subtraction Word Problems Within 20 Worksheets

The same six CGI formats, one step down: every number and answer stays at or under 20.

Addition and Subtraction Word Problems | Match the Equation

A different skill at the same numbers: match a printed equation to the story instead of writing one.

Two-Digit Addition and Subtraction Regrouping Worksheets

Bare column addition and subtraction with base-ten blocks, no word problems.

Part of the K-2 Math Practice collection — new products in this collection are added regularly. Click **Follow** on the store page and TPT will email you when they go up.
