

# CVC SPELLING PROGRESS MONITORING

One skill, start to finish: the IEP goal, six probe forms, the graph. Untimed. Fillable PDF.

**CVC SPELLING Spelling: CVC Words – Goal and Directions**

Goal, baseline, directions and benchmarks for one skill. Untimed; score is words spelled correctly out of 10.

The teacher says a three-sound word and the student writes it. Ten words per form from an 80-word bank of simple CVC words, sixty across the six forms, none on two forms. This is a dictation probe. The words are printed small in the right-hand column for you to fold or cover that column, or use it as the teacher copy and give the student a clean one.

**Sample goal — Invented; edit every bracket to fit the student**  
By [insert review date], when the teacher dictates 10 CVC words, [Student] will spell [8 of 10] words correctly on [3] consecutive weekly probes, as measured by teacher-scored spelling probes.

BY (DATE) \_\_\_\_\_ CRITERION (SCORE OUT OF 10, OR PERCENT) \_\_\_\_\_

|           |             |              |              |      |
|           |             |              |              |      |

**Giving and scoring the probe**

- ☐ Say the word, use it in a sentence, say it again. Give the student time to write before moving on.
- ☐ Correct every letter right and in order. Handwriting that is legible counts; letter formation is a different goal.
- ☐ A reversed letter is correct if the word is unambiguous. Write your rule in the scoring rules below so a paraprofessional scores it the way you do.
- ☐ Untimed. Read the list at the student's pace, not yours.

**CVC SPELLING Spelling: CVC Words – Form A**

TEACHER DICTATES. Say each word, the student writes it on the line. Untimed.

NAME \_\_\_\_\_ DATE \_\_\_\_\_ FORM **A** untimed - 10 items

**IEP GOAL THIS PROBE MEASURES**  
Sample: By [insert review date], when the teacher dictates 10 CVC words, [Student] will spell [8 of 10] words correctly on [3] consecutive weekly probes, as measured by teacher-scored spelling probes.  
GOAL AS WRITTEN FOR THIS STUDENT (TYPE IT ONCE, THEN PRINT THE FORM)

TEACHER READS THE WORD IN THE RIGHT-HAND COLUMN. THE STUDENT WRITES ON THE LINE

|         |         |           |    |    |    |    |    |    |    |    |       |                     |

**How to fill it**

- ☐ One row per student who has a goal on this skill. Baseline is the median of the first three probes.
- ☐ One column per weekly probe. Write the score out of 10, not a percent, so the rows compare.
- ☐ Trend up, flat or down over the last four probes. That word, not the last score, is what the decision follows.
- ☐ Decision keep going, change the teaching, or raise

**What it is for**

Grouping: When six students sit on the same goal, the individual graphs answer "how is this child doing" and nothing answers "who needs the same fifteen minutes." Rows that are flat together are a group; a row that is flat alone is a different question. Take this page to the data meeting instead of ten folders.

**EXAMPLE A Filled-In Data Log (Invented Student)**

Tess is invented. Twelve weekly probes on CVC spelling, the aim line, the change that three low points for, and the criterion being met.

**The goal, as written for Tess, first grade (invented)**  
By May 20, when the teacher dictates 10 CVC words, Tess will spell 8 of 10 words correctly on 3 consecutive weekly probes, as measured by teacher-scored spelling probes (forms A-F).

| #  | DATE  | FORM | CORRECT | ERRORS | GRAPHED | NOTES                                                            |
|----|-------|------|---------|--------|---------|------------------------------------------------------------------|
| 1  | 9/8   | A    | 3       | 7      | 3       | baseline                                                         |
| 2  | 9/9   | B    | 4       | 6      | 4       | baseline                                                         |
| 3  | 9/10  | C    | 3       | 7      | 3       | baseline (median of 3, 4, 3 = 3)                                 |
| 4  | 9/17  | D    | 4       | 6      | 4       | first and last sounds right, the vowel wrong on 6 of the misses  |
| 5  | 9/24  | E    | 4       | 6      | 4       | same pattern                                                     |
| 6  | 10/1  | F    | 3       | 7      | 3       | 3 under aim line: taught the five short vowels with a sound wall |
| 7  | 10/8  | A    | 5       | 5      | 5       | -                                                                |
| 8  | 10/15 | B    | 6       | 4      | 6       | -                                                                |
| 9  | 10/22 | C    | 7       | 3      | 7       | errors narrowing to one pattern                                  |
| 10 | 10/29 | D    | 7       | 3      | 7       | -                                                                |
| 11 | 11/5  | E    | 8       | 2      | 8       | criterion met, 1 of 3                                            |
| 12 | 11/12 | F    | 8       | 2      | 8       | criterion met, 2 of 3                                            |

**How to read the log**

- ☐ Baseline was the median of three forms on three days: 3, 4, 3, so 3. Not the average, not the last.
- ☐ The aim line runs from 3 in week 1 to 8 at the goal date. Probes 4, 5 and 6 (4, 4, 3) sat under it three in a row, so the teaching changed and the change is written on the row.
- ☐ The notes name the pattern, not just the count: "first and last sounds right, the vowel wrong on 6 of the misses" is what sent the teaching somewhere specific, and a score on its own would not have said that.
- ☐ Criterion met on probes 11 and 12: one more consecutive probe at 8 or better and the goal is met.

**The progress report sentence this log produces**  
"On weekly CVC spelling probes (10 items, untimed), Tess scored 3 of 10 at baseline in September and 8 of 10 on October 12, 2019, and met the criterion of 8 of 10 on November 12, 2019."

**PROGRESS MONITORING How This Pack Works**

Goal, baseline, weekly probe, graph, decision. Six steps, one skill.

A progress monitoring goal needs a thing to count and a page to count it on. This file is both, for one skill: a goal written in the probe's own words, 6 equivalent forms of the probe that measures it, and a graph scaled to it. Nothing has to be built or found.

- Baseline.** Give Forms A, B and C on three different days. The middle score of the three is the baseline; write it on the goal page.
- Write the goal** from the six-part frame on the goal page. Start from the sample and change every bracket: the date, the condition, the criterion, the number of probes.
- Probe once a week** with the forms in rotation (A, B, C, D, E, F, A...). Never the same form two weeks running. Every form is ten items, untimed.
- Log and plot** the score the same day. Draw the aim line first, from the baseline on the left to the criterion at the goal date on the right, then plot each week's dot.
- Decide from the graph.** Three dots in a row under the aim line: change the teaching this week and write the change on the log. Three in a row over it: raise the target.
- Report from the log.** The log gives the progress report its numbers: baseline, the last two scores, and what the errors keep landing on.

**The weekly routine, about five minutes**

- ☐ Monday: pull the next form in the rotation (A, B, C, D, E, F, A...).
- ☐ Any day: give the probe one-to-one, untimed; ten items takes a few minutes.
- ☐ Same day: score it, log the row, plot the point, look at the last three points.
- ☐ Friday: if three points sit under the aim line, write the change you are making on the log.

**Print and prep**

- ☐ Print one copy of each form for yourself! The student never uses this page — you read from it and mark on it — so one set lasts the year.
- ☐ The teacher copy is the one you mark on; the student copy stays clean.
- ☐ Keep the goal page and the graph page for each student at the front of the data folder; type into them or write on them.
- ☐ The caseload page is one grid for every student on this goal; print it once a month.

**What this probe is not**

It is not a norm-referenced test and it carries no benchmark score. The sample goal uses invented criteria in brackets; your team sets the real ones from the baseline and the student's IEP. Every form is

**Equivalent forms, and why it matters**

Every form has ten items drawn the same way, from one shuffle of the same bank, and no item appears on two forms — 60 different items across the six forms. A score on one form means the same as a

Goal, baseline, weekly probe, graph, decision. Six steps, one skill.

- 6 **Report from the log.** The log gives the progress report its numbers: baseline, the last two scores, and what the errors keep landing on.

#### The weekly routine, about five minutes

- ☐ Monday: pull the next form in the rotation (A, B, C, D, E, F, A...).
- ☐ Any day: give the probe one-to-one, untimed; ten items takes a few minutes.
- ☐ Same day: score it, log the row, plot the point, look at the last three points.
- ☐ Friday: if three points sit under the aim line, write the change you are making on the log.

#### Print and prep

- ☐ Print one copy of each form for yourself. The student never sees this page — you read from it and mark on it — so one set lasts the year.
- ☐ The teacher copy is the one you mark on; the student copy stays clean.
- ☐ Keep the goal page and the graph page for each student at the front of the data folder; type into them or write on them.
- ☐ The caseload page is one grid for every student on this goal: print it once a month.

#### What this probe is not

It is not a norm-referenced test and it carries no benchmark score. The sample goal uses invented criteria in brackets; your team sets the real ones from the baseline and the student's IEP. Every form is untimed and ten items long, so a score of 8 means the same thing on every form, and a student is never scored on speed.

#### Equivalent forms, and why it matters

Every form has ten items drawn the same way, from one shuffle of the same bank, and no item appears on two forms — 60 different items across the six forms. A score on one form means the same as a score on another, so the line on the graph is the student, not the paper. Rotate the forms and the page cannot be memorized.

# Spelling: CVC Words – Goal and Directions

Goal, baseline, directions and benchmarks for one skill. Untimed; score is words spelled correctly out of 10.

The teacher says a three-sound word and the student writes it. Ten words per form from an 80-word bank of simple CVC words, sixty across the six forms, none on two forms. This is a dictation probe. The words are printed small in the right-hand column for you; fold or cover that column, or use it as the teacher copy and give the student a clean one.

## Sample goal — invented; edit every bracket to fit the student

By [annual review date], when the teacher dictates 10 CVC words, [Student] will spell [8 of 10] words correctly on [3] consecutive weekly probes, as measured by teacher-scored spelling probes.

## Giving and scoring the probe

- ☐ Say the word, use it in a sentence, say it again. Give the student time to write before moving on.
- ☐ Correct: every letter right and in order. Handwriting that is legible counts; letter formation is a different goal.
- ☐ A reversed letter is correct if the word is unambiguous. Write your rule in the scoring rules below so a paraprofessional scores it the way you do.
- ☐ Untimed. Read the list at the student's pace, not yours.

|   |      |      |         |        |                     |                                         |
|   |      |      |         |        |                     |                                         |

Every student on this goal, on one grid. Twelve rows, eight probes, one decision column.

### MARKING PERIOD

[illegible]

## How to fill it

- ☐ One row per student who has a goal on this skill. Baseline is the median of the first three probes.
- ☐ One column per weekly probe; write the score out of 10, not a percent, so the rows compare.
- ☐ Trend: up, flat or down over the last four probes. That word, not the last score, is what the decision follows.
- ☐ Decision: keep going, change the teaching, or raise the target. A blank decision on a flat row is the thing this page exists to catch.

### What it is for

Grouping. When six students sit on the same goal, the individual graphs answer “how is this child doing” and nothing answers “who needs the same fifteen minutes.” Rows that are flat together are a group; a row that is flat alone is a different question. Take this page to the data meeting instead of ten folders.

**EXAMPLE**

## A Filled-In Data Log (Invented Student)

Tess is invented. Twelve weekly probes on CVC spelling, the aim line, the change that three low points forced, and the criterion being met.

### The goal, as written for Tess, first grade (invented)

*By May 20, when the teacher dictates 10 CVC words, Tess will spell 8 of 10 words correctly on 3 consecutive weekly probes, as measured by teacher-scored spelling probes (forms A–F).*

| #  | DATE  | FORM | CORRECT | ERRORS | GRAPHED | NOTES                                                            |
|----|-------|------|---------|--------|---------|------------------------------------------------------------------|
| 1  | 9/8   | A    | 3       | 7      | 3       | baseline                                                         |
| 2  | 9/9   | B    | 4       | 6      | 4       | baseline                                                         |
| 3  | 9/10  | C    | 3       | 7      | 3       | baseline (median of 3, 4, 3 = 3)                                 |
| 4  | 9/17  | D    | 4       | 6      | 4       | first and last sounds right, the vowel wrong on 6 of the misses  |
| 5  | 9/24  | E    | 4       | 6      | 4       | same pattern                                                     |
| 6  | 10/1  | F    | 3       | 7      | 3       | 3 under aim line: taught the five short vowels with a sound wall |
| 7  | 10/8  | A    | 5       | 5      | 5       | –                                                                |
| 8  | 10/15 | B    | 6       | 4      | 6       | –                                                                |
| 9  | 10/22 | C    | 7       | 3      | 7       | errors narrowing to one pattern                                  |
| 10 | 10/29 | D    | 7       | 3      | 7       | –                                                                |
| 11 | 11/5  | E    | 8       | 2      | 8       | criterion met, 1 of 3                                            |
| 12 | 11/12 | F    | 8       | 2      | 8       | criterion met, 2 of 3                                            |

### How to read the log

- ☐ Baseline was the median of three forms on three days: 3, 4, 3, so 3. Not the average, not the best.
- ☐ The aim line runs from 3 in week 1 to 8 at the goal date. Probes 4, 5 and 6 (4, 4, 3) sat under it: three in a row, so the teaching changed and the change is written on the row.
- ☐ The notes name the pattern, not just the count: “first and last sounds right, the vowel wrong on 6 of the misses” is what sent the teaching somewhere specific, and a score on its own would not have said that.
- ☐ Criterion met on probes 11 and 12; one more consecutive probe at 8 or better and the goal is met.

### The progress report sentence this log produces

*“On weekly CVC spelling probes (10 items, untimed), Tess scored 3 of 10 at baseline in September and 8 of 10 on each of the two most recent probes in November. Progress is sufficient to meet the goal of 8 of 10 on three consecutive probes by May.” Every number in it is on the log above; nothing is from memory.*
