Fine Motor Hole Punch Cards

Task box: follow the path, match, count. 3 levels

What's inside

- 36 punch cards: 12 at each level, in color and in black and white
- A "how to punch" step page for the student
- Two student recording sheets (Levels 2 and 3)
- Box and bag labels, an answer key and a data sheet

Set up

Print on cardstock and cut on the dashed lines. Put each level in its own bag or envelope with the matching label. Keep a hand punch and a small cup for the punched dots in the box. Every punch circle is 0.40 in across, sized for a standard 1/4 in single hole punch, and sits near the card's bottom edge where a hand punch can reach it.

The three levels

- ● Level 1: follow the path 71 dots in all, in paths of 5 to 7. No answer to choose: the student punches every dot along the path.
- ■ Level 2: match A big numeral or letter on top, two to pick from. Punch the one that is the same.
- ▲ Level 3: count Count the pictures in the ten frame (1 to 10), then punch the right number from four.

Levels are marked with a shape, not a number, so students are not comparing levels.

How to run it

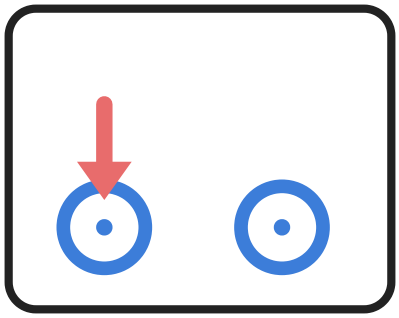

Show the "how to punch" page first. Give one card at a time. After a student punches, check the hole against the answer key. The recording sheets are for students who can write. Use whatever punch and support your team has set up for the student. Mark the data sheet with cards correct out of cards given.
