Terms of Use

Please read before you print your first page.

One classroom license

- This free file is for one classroom: one teacher, one group of students.
- Please do not share it, post it online, or sell it.
- Colleagues can download their own free copy from the store.

This is a fillable PDF

- Open it in a PDF reader (Adobe Acrobat Reader, Preview, or your browser), click into a box, type, and Save As.
- The name line and every answer box on the student pages are type-in fields. You can also print any page and write by hand.
- It works offline. No account, no subscription, no internet connection needed after you download it.

Print at 100 percent

Turn off fit to page and shrink to fit so the numbers and answer boxes stay big enough for small hands. Every page prints in color or in black and white. In black and white the two groups can still be told apart: the second group of dots has a white center, and pictures sit in two separate boxes.

Student work

A page a child has typed on carries a name. Keep it with your other student work, and use a first name only on any page that leaves your hands.

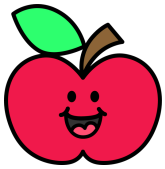

Need help?

If a box will not behave or a page will not print the way you expect, use Ask a Question on the product page. Every question is read, and a fix to the file ships as a free update.
