Geoboard Task Cards

Look at the card. Copy it with a rubber band.

Start here

1. Print a card page and cut on the dashed lines. Each page cuts into 6 big cards.
2. The student copies a card onto a geoboard with a rubber band.
3. The student draws what was made on the draw sheet. Check it against the card. Mark the data sheet.

What's inside

- 30 cards on 5 pages: 6 at Level 1, 12 at Level 2, 12 at Level 3, in color and the same 30 in blackline
- A blank 5 by 5 template, a Look / Draw page to try first, a draw sheet for each level
- A worked example, a card list, a data sheet with a progress graph, a note for home, a What's next page

The three levels

- ● Level 1 One band, 3 or 4 corners: squares, rectangles, triangles.
- ■ Level 2 Slanted sides, more corners, or more than one band.
- ▲ Level 3 Capital letters made with 1 to 3 open bands.

Cards are in order from easier to harder inside each level, by how many band pieces the shape needs. Each level is marked with a shape, not a number. The band colors (red, blue, green, orange) only help students see where one band ends and the next begins.

What you need

A geoboard with a 5 by 5 grid of pegs, or any larger board (use the pegs in one corner), and rubber bands. A geoboard and rubber bands are not included. This is a print-and-cut file, not a digital or fillable one.

Ideas, and when to move on

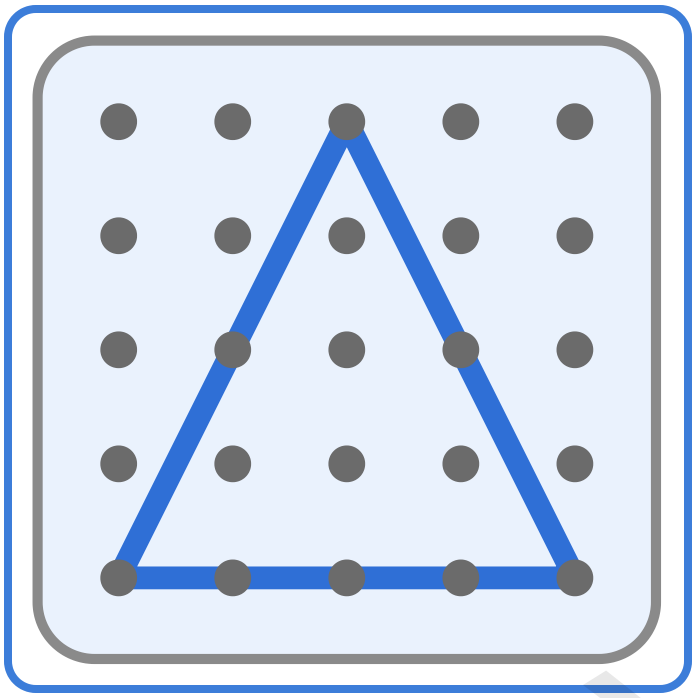

Partner turn: one student says where the band goes, the partner makes it. Check: hold the board next to the card. You decide when to move up; one idea is every card right two days in a row.
