

MULTIPLE MEANING WORDS (HOMOGRAPHS)

One skill, start to finish: the IEP goal, six probe forms, the graph. Untimed. Fillable PDF.

MULTIPLE MEANING WORDS Multiple Meaning Words: Determine the Meaning in Context – Goal and Directions

Goal, baseline, directions and benchmarks for one skill. Untimed, score is meanings correct out of 10.

Ten sentences per form, each with a bolded multiple-meaning word (a homograph) and its own two-meaning choice shown in parentheses: the student decides which meaning the sentence supports and writes only that word in the box. Ten common multiple-meaning words, the same ten every form, with both meanings of each word tested across the six forms, so a missed item names the word, not just a lower score.

Sample goal — Invented; edit every bracket to fit the student

By [annual review date], when given 10 sentences each using a multiple-meaning word with its own two-meaning choice shown in parentheses, [Student] will write the meaning the sentence's context supports for 8 of 10 sentences on 2 consecutive weekly probes, as measured by teacher-scored multiple meaning words probes.

Benchmarks toward the goal

BENCHMARK	TARGET DATE	TARGET SCORE	ACTUAL SCORE	MET?

Giving and scoring the probe

☐ Say: "Read each sentence. Decide which meaning in the parentheses fits the sentence. Write that word in the box."

☐ Correct: the meaning that the rest of the sentence supports, spelled exactly as shown in the parentheses.

Multiple Meaning Words - Form A

My name: _____ Date: _____

Read each sentence. Write the word's meaning in the box.

READ THE WHOLE SENTENCE - WRITE THE MEANING IN THE BOX

- She tied a bright red **bow** (ribbon / bend) around the gift box.
- She walked into the **bank** (money / river) to deposit her birthday check.
- The soft **light** (glow / weight) from the lamp filled the reading corner.
- At dusk, a **bat** (animal / stick) swooped through the yard, catching insects in the dark.
- The kids played on the swings at the **park** (space / parking) all afternoon.
- The whole town gathered at the county **fair** (carnival / equal) for rides and games.
- The flowers bloom every **spring** (season / jump) when the weather warms up.
- The dog's loud **bark** (sound / tree) startled the mail carrier at the front gate.
- He skipped a flat **rock** (stone / music) across the surface of the lake.

MULTIPLE MEANING WORDS Multiple Meaning Words: Determine the Meaning in Context – Data Log and Graph

One row per probe. Three points in a row under the aim line is a decision, not a feeling: change the teaching and write what changed in the notes.

MULTIPLE MEANING WORDS Multiple Meaning Words: Determine the Meaning in Context – Caseload Summary

Every student on this goal, on one grid. Twelve rows, eight probes, one decision column.

TEACHER / CASE MANAGER SKILL (AS THE GOAL WORDS IT) MARKING PERIOD

STUDENT	BASILINE	CRITERION	P1	P2	P3	P4	P5	P6	P7	P8	TREND	DECISION THIS MONTH

How to fill it

☐ One row per student who has a goal on this skill. Baseline is the median of the first three probes.

☐ One column per weekly probe; write the score out of 10, not a percent, so the rows compare.

☐ Trend: up, flat or down over the last four probes. That word, not the last score, is what the decision follows.

What it is for

Grouping: When six students sit on the same goal, the individual graphs answer "how is this child doing" and nothing answers "who needs the same fifteen minutes." Rows that are flat together are a group; a row that is flat alone is a different question. Take this page to the data meeting instead of ten folders.

EXAMPLE A Filled-In Data Log (Invented Student)

Jayden is invented. Twelve weekly probes on multiple meaning words, the aim line, the change that three low points forced, and the criterion being met.

The goal, as written for Jayden, fourth grade (invented)

By May 20, when given 10 sentences each using a multiple-meaning word with its own two-meaning choice shown in parentheses, Jayden will write the meaning the sentence's context supports for 8 of 10 sentences on 3 consecutive weekly probes, as measured by teacher-scored multiple meaning words probes (forms A-F).

#	DATE	FORM	CORRECT	ERRORS	GRAPHED	NOTES
1	9/8	A	2	8	2	baseline
2	9/9	B	3	7	3	baseline
3	9/10	C	3	7	3	baseline (median of 2, 3, 3 = 3)
4	9/17	D	3	7	3	wrote the right meaning for ring, bank and park, but missed rock, bat, fox, light, spring, bark and bow
5	9/24	E	2	8	2	same pattern
6	10/1	F	3	7	3	3 under aim line: sorted the seven missed words into two-meaning picture cards and reviewed both meanings side by side before returning to the probe
7	10/8	A	5	5	5	—
8	10/15	B	6	4	6	—
9	10/22	C	7	3	7	errors narrowing to one pattern
10	10/29	D	7	3	7	—
11	11/5	E	8	2	8	criterion met, 1 of 3
12	11/12	F	8	2	8	criterion met, 2 of 3

How to read the log

☐ Baseline was the median of three forms on three days: 2, 3, 3, so 3. Not the average, not the best.

☐ The aim line runs from 3 in week 1 to 8 at the goal date. Probes 4, 5 and 6 (3, 2, 3) sat under it: three in a row, so the teaching changed and the change is written on the row.

☐ The notes name the pattern, not just the count: "wrote the right meaning for ring, bank and park, but missed rock, bat, fox, light, spring, bark and bow" is what sent the teaching somewhere specific, and a score on its own would not have said that.

☐ Criterion met on probes 11 and 12; one more consecutive probe at 8 or better and the goal is met.

PROGRESS MONITORING How This Pack Works

Goal, baseline, weekly probe, graph, decision. Six steps, one skill.

A progress monitoring goal needs a thing to count and a page to count it on. This file is both, for one skill; a goal written in the probe's own words, 6 equivalent forms of the probe that measures it, and a graph scaled to it. Nothing has to be built or found.

- Baseline.** Give Forms A, B and C on three different days. The middle score of the three is the baseline; write it on the goal page.
- Write the goal** from the six-part frame on the goal page. Start from the sample and change every bracket: the date, the condition, the criterion, the number of probes.
- Probe once a week** with the forms in rotation (A, B, C, D, E, F, A...). Never the same form two weeks running. Every form is ten items, untimed. Score it against the answer key (pages 16-17).
- Log and plot** the score the same day. Draw the aim line first, from the baseline on the left to the criterion at the goal date on the right, then plot each week's dot.
- Decide from the graph.** Three dots in a row under the aim line: change the teaching this week and write the change on the log. Three in a row over it: raise the target.
- Report from the log.** The log gives the progress report its numbers: baseline, the last two scores, and what the error kept landing on.

The weekly routine, about five minutes

☐ Monday: pull the next form in the rotation (A, B, C, D, E, F, A...).

☐ Any day: give the probe one-to-one, untimed; ten items takes a few minutes.

☐ Same day: score it; log the row, plot the point, look at the last three points.

☐ Friday: if three points sit under the aim line, write the change you are making on the log.

Print and prep

☐ Print one copy per student per week: the student writes on the form and that same sheet is the one you score.

☐ The forms are student sheets with nothing on them but the problems. The answer key and the Correct ____ / 10 box for every form are on pages 16 and 17; score there, then log it.

☐ Keep the goal page and the graph page for each student at the front of the data folder; type into them or write on them.

☐ The caseload page is one grid for every student on this goal; print it once a month.

What this probe is not

It is not a norm-referenced test and it carries no benchmark score. The sample goal uses invented

Equivalent forms, and why it matters

Every form has ten items drawn the same way, from one shuffle of the same bank, and no item appears

Goal, baseline, weekly probe, graph, decision. Six steps, one skill.

A progress monitoring goal needs a thing to count and a page to count it on. This file is both, for one skill: a goal written in the probe's own words, 6 equivalent forms of the probe that measures it, and a graph scaled to it. Nothing has to be built or found.

Print and prep

- ☐ Print one copy per student per week: the student writes on the form and that same sheet is the one you score.
- ☐ The forms are student sheets with nothing on them but the problems. The answer key and the Correct ____ / 10 box for every form are on pages 16 and 17; score there, then log it.
- ☐ Keep the goal page and the graph page for each student at the front of the data folder; type into them or write on them.
- ☐ The caseload page is one grid for every student on this goal: print it once a month.

What this probe is not

It is not a norm-referenced test and it carries no benchmark score. The sample goal uses invented criteria in brackets; your team sets the real ones from the baseline and the student's IEP. Every form is untimed and ten items long, so a score of 8 means the same thing on every form, and a student is never scored on speed.

Equivalent forms, and why it matters

Every form has ten items drawn the same way, from one shuffle of the same bank, and no item appears on two forms — 60 different items across the six forms. A score on one form means the same as a score on another, so the line on the graph is the student, not the paper. Rotate the forms and the page cannot be memorized.

Multiple Meaning Words: Determine the Meaning in Context — Goal and Directions

Goal, baseline, directions and benchmarks for one skill. Untimed; score is meanings correct out of 10.

Ten sentences per form, each with a bolded multiple-meaning word and its own two-meaning choice shown in parentheses: the student decides which meaning fits and writes only that word in the box. Ten multiple-meaning words, the same ten every form, so a missed item names the word, not just a lower score.

Sample goal — invented; edit every bracket to fit the student

By [annual review date], when given 10 sentences each with a multiple-meaning word and its own two-meaning choice in parentheses, [Student] will write the meaning the sentence supports for [8 of 10] sentences on [3] consecutive weekly probes, as measured by teacher-scored multiple-meaning probes.

Giving and scoring the probe

- ☐ Say: “Read each sentence. Decide which meaning in the parentheses fits the sentence. Write that word in the box.”
- ☐ Correct: the meaning that the rest of the sentence supports, spelled exactly as shown in the parentheses.
- ☐ Same ten multiple-meaning words every form, so a missed item names the word and meaning, not just the score.
- ☐ Untimed. Let the student finish all ten.

Scoring rules for this student (accepted answers, reversals, supports allowed)

What the errors say to reteach (carry over from the log)

My name: _____

Date: _____

Read each sentence. Write the word's meaning in the box.

READ THE WHOLE SENTENCE · WRITE THE MEANING IN THE BOX

1. She tied a bright red **bow** (ribbon / bend) around the gift box.

2. She walked into the **bank** (money / river) to deposit her birthday check.

3. The soft **light** (glow / weight) from the lamp filled the reading corner.

4. At dusk, a **bat** (animal / stick) swooped through the yard, catching insects in the dark.

5. The kids played on the swings at the **park** (space / parking) all afternoon.

6. The whole town gathered at the county **fair** (carnival / equal) for rides and games.

7. The flowers bloom every **spring** (season / jump) when the weather warms up.

8. The dog's loud **bark** (sound / tree) startled the mail carrier at the front gate.

9. He skipped a flat **rock** (stone / music) across the surface of the lake.

10. She slipped the shiny **ring** (jewelry / chime) onto her finger before the ceremony.

My name: _____

Date: _____

Read each sentence. Write the word's meaning in the box.

READ THE WHOLE SENTENCE · WRITE THE MEANING IN THE BOX

1. The teacher made sure every rule was **fair** (carnival / equal) for the whole class.

2. The cat gave a sudden **spring** (season / jump) onto the kitchen counter.

3. Dad had to **park** (space / parking) the car three blocks away from the stadium.

4. The actor took a deep **bow** (ribbon / bend) as the audience clapped loudly.

5. The band played loud **rock** (stone / music) songs at the school talent show.

6. The loud **ring** (jewelry / chime) of the school bell signaled the end of class.

7. The rough **bark** (sound / tree) of the old oak felt scratchy under her palm.

8. The player gripped the wooden **bat** (animal / stick) and swung hard at the pitch.

9. The fishermen sat along the **bank** (money / river) waiting for a bite.

10. The empty backpack felt surprisingly **light** (glow / weight) on her shoulders.

Multiple Meaning Words: Determine the Meaning in Context — Data Log and Graph

TEACHER / CASE MANAGER

SKILL (AS THE GOAL WORDS IT)

MARKING PERIOD

[illegible]

How to fill it

- ☐ One row per student who has a goal on this skill. Baseline is the median of the first three probes.
- ☐ One column per weekly probe; write the score out of 10, not a percent, so the rows compare.
- ☐ Trend: up, flat or down over the last four probes. That word, not the last score, is what the decision follows.
- ☐ Decision: keep going, change the teaching, or raise the target. A blank decision on a flat row is the thing this page exists to catch.

What it is for

Grouping. When six students sit on the same goal, the individual graphs answer “how is this child doing” and nothing answers “who needs the same fifteen minutes.” Rows that are flat together are a group; a row that is flat alone is a different question. Take this page to the data meeting instead of ten folders.

EXAMPLE

A Filled-In Data Log (Invented Student)

Jayden is invented. Twelve weekly probes on multiple meaning words, the aim line, the change that three low points forced, and the criterion being met.

The goal, as written for Jayden, fourth grade (invented)

By May 20, when given 10 sentences each with a multiple-meaning word and its own two-meaning choice in parentheses, Jayden will write the meaning the sentence supports for 8 of 10 sentences on 3 consecutive weekly probes, as measured by teacher-scored multiple-meaning probes (forms A–F).

#	DATE	FORM	CORRECT	ERRORS	GRAPHED	NOTES
1	9/8	A	2	8	2	baseline
2	9/9	B	3	7	3	baseline
3	9/10	C	3	7	3	baseline (median of 2, 3, 3 = 3)
4	9/17	D	3	7	3	wrote the right meaning for ring, bank and park, but missed rock, bat, fair, light, spring, bark and bow
5	9/24	E	2	8	2	same pattern
6	10/1	F	3	7	3	3 under aim line: sorted the seven missed words into two-meaning picture cards and reviewed both meanings side by side before returning to the probe
7	10/8	A	5	5	5	–
8	10/15	B	6	4	6	–
9	10/22	C	7	3	7	errors narrowing to one pattern
10	10/29	D	7	3	7	–
11	11/5	E	8	2	8	criterion met, 1 of 3
12	11/12	F	8	2	8	criterion met, 2 of 3

How to read the log

- ☐ Baseline was the median of three forms on three days: 2, 3, 3, so 3. Not the average, not the best.
- ☐ The aim line runs from 3 in week 1 to 8 at the goal date. Probes 4, 5 and 6 (3, 2, 3) sat under it: three in a row, so the teaching changed and the change is written on the row.
- ☐ The notes name the pattern, not just the count: “wrote the right meaning for ring, bank and park, but missed rock, bat, fair, light, spring, bark and bow” is what sent the teaching somewhere specific, and a score on its own would not have said that.
- ☐ Criterion met on probes 11 and 12; one more consecutive probe at 8 or better and the goal is met.

The progress report sentence this log produces

“On weekly multiple meaning words probes (10 items, untimed), Jayden scored 3 of 10 at baseline in September and 8 of 10 on each of the two most recent probes in November. Progress is sufficient to meet the goal of 8 of 10 on three consecutive probes by May.” Every number in it is on the log above; nothing is from memory.
