Terms of Use

Please read before you print your first page.

One classroom license

This file is for one classroom: one teacher, one group of students. Please do not share it, post it online, or sell it. Extra licenses for a team or a school are on the product page.

This is a print PDF

Print the pages, cut, sort and glue, and write on the lines by hand. It works offline, with no account and no subscription. It is not a slide or word processor file.

Print at 100 percent

Turn off fit to page so every piece keeps its size and the pieces still fit the mats. Cardstock holds up best; copy paper works too. Each level also reads in black and white.

Need help?

Use Ask a Question on the product page before leaving a review. Every question is read, and a fix to the file ships as a free update. Please include the name of the product and what you saw on the page, so the answer can be quick and exact.

How to prepare it

Cut the picture pieces apart on the dashed lines and keep each level in its own envelope. Glue sticks work best, and a small sorting tray keeps loose pieces from drifting off the table.

Keep it going

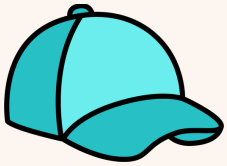

Save the mats in a folder and re-use the cut pieces for a game or a quick review. Print a fresh data sheet whenever you start a new round. Talk about each picture as you place it: what is it, and what do you do with it?

- Across all 6 tries: 49 of 60 placed right (82 percent).
- Notes you could write: "Placed all but 2 pieces on Level 2 without a model. Said 'you wear it' for clothing."

Percent = pieces placed right divided by pieces tried. Your district decides what counts as mastery; write it here: _____
