SPECIAL EDUCATION

EDITABLE

ALL, SOME, NONE, MOST

One skill, start to finish: the IEP goal, six probe forms, the graph. Untimed. Fillable PDF.

QUANTIFIERS Quantifiers (All, Some, None, Most) — Goal and Directions

Goal, baseline, directions and benchmarks for one skill. Untimed; score is quantifier items correct out of 10.

Ten quantifier items per form: two state that all of a named set share one color, two state a color that none of the set has, three ask about the smaller of two color groups within a set (some), and three ask about the larger of two color groups within a set (most). The student writes the one correct word in the box. More/fewer, most/least and many/few basic concepts are a separate product.

Sample goal — invented; edit every bracket to fit the student

By [annual review date], when given 10 items naming all, none, or part of a set, [Student] will write the correct quantifier word for [8 of 10] items on [3] consecutive weekly probes, as measured by teacher-scored quantifier concept probes.

Benchmarks toward the goal

BENCHMARK	TARGET DATE	TARGET SCORE	ACTUAL SCORE	MET?

Giving and scoring the probe

- ☐ Say: "Read the item. Decide which word is correct and write it in the box."
- ☐ Correct: the exact word on the key — all, none, some or most.

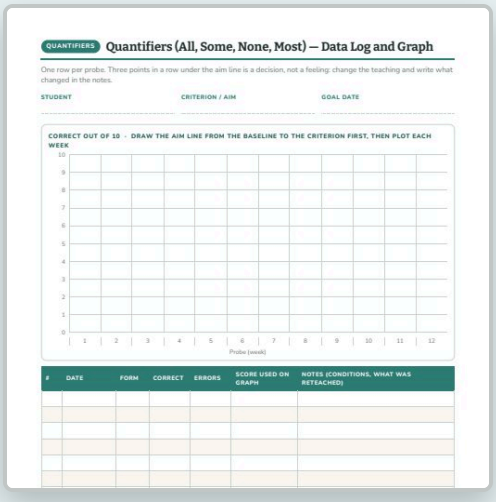

Quantifiers · Form A

My name: _____ Date: _____

Read each one. Write the word in the box.

READ EACH ITEM · WRITE THE CORRECT WORD IN THE BOX

1. Zara has 2 shells. All 2 are orange. ___ of Zara's shells are orange. (all / none) ☐
2. Sana has 5 buttons. 1 is orange and 4 are red. ___ of Sana's buttons are orange. (some / most) ☐
3. Mira has 10 blocks. 3 are pink and 7 are brown. ___ of Mira's blocks are brown. (most / some) ☐
4. Talia has 8 buttons. 3 are brown and 5 are orange. ___ of Talia's buttons are orange. (most / some) ☐
5. Gus has 13 crayons. 6 are pink and 7 are yellow. ___ of Gus's crayons are yellow. (some / most) ☐
6. Owen has 12 stickers. 2 are red and 10 are blue. ___ of Owen's stickers are red. (some / most) ☐
7. Kian has 3 shells. All 3 are green. ___ of Kian's shells are purple. (none / all) ☐
8. Gus has 8 shells. All 8 are purple. ___ of Gus's shells are pink. (all / none) ☐

QUANTIFIERS Quantifiers (All, Some, None, Most) — Data Log and Graph

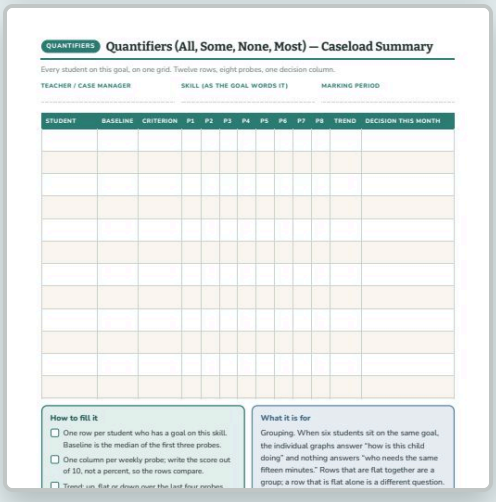

One row per probe. Three points in a row under the aim line is a decision, not a feeling: change the teaching and write what changed in the notes.

STUDENT CRITERION / AIM GOAL DATE

CORRECT OUT OF 10 · DRAW THE AIM LINE FROM THE BASELINE TO THE CRITERION FIRST, THEN PLOT EACH WEEK

Probe (week)

#	DATE	FORM	CORRECT	ERRORS	SCORE USED ON GRAPH	NOTES (CONDITIONS, WHAT WAS RETEACHED)

QUANTIFIERS Quantifiers (All, Some, None, Most) — Caseload Summary

Every student on this goal, on one grid. Twelve rows, eight probes, one decision column.

TEACHER / CASE MANAGER SKILL (AS THE GOAL WORDS IT) MARKING PERIOD

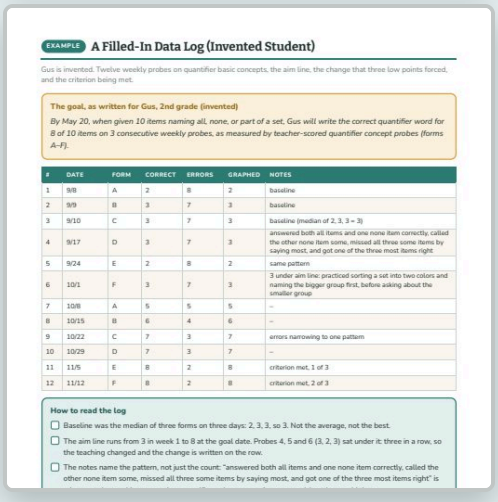

STUDENT	BASELINE	CRITERION	P1	P2	P3	P4	P5	P6	P7	P8	TREND	DECISION THIS MONTH

How to fill it

- ☐ One row per student who has a goal on this skill. Baseline is the median of the first three probes.
- ☐ One column per weekly probe; write the score out of 10, not a percent, so the rows compare.
- ☐ Trend: up, flat or down over the last four probes.

What it is for

Grouping. When six students sit on the same goal, the individual graphs answer "how is this child doing" and nothing answers "who needs the same fifteen minutes." Rows that are flat together are a group; a row that is flat alone is a different question.

EXAMPLE A Filled-In Data Log (Invented Student)

Gus is invented. Twelve weekly probes on quantifier basic concepts, the aim line, the change that three low points forced, and the criterion being met.

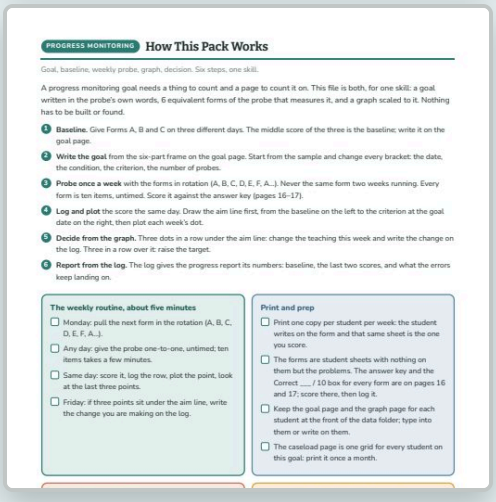

The goal, as written for Gus, 2nd grade (invented)

By May 20, when given 10 items naming all, none, or part of a set, Gus will write the correct quantifier word for 8 of 10 items on 3 consecutive weekly probes, as measured by teacher-scored quantifier concept probes (forms A–F).

#	DATE	FORM	CORRECT	ERRORS	GRAPHED	NOTES
1	9/8	A	2	8	2	baseline
2	9/9	B	3	7	3	baseline
3	9/10	C	3	7	3	baseline (median of 2, 3, 3 = 3)
4	9/17	D	3	7	3	answered both all items and one none item correctly, called the other none item some, missed all three some items by saying most, and got one of the three most items right
5	9/24	E	2	8	2	same pattern
6	10/1	F	3	7	3	3 under aim line: practiced sorting a set into two colors and naming the bigger group first, before asking about the smaller group
7	10/8	A	5	5	5	–
8	10/15	B	6	4	6	–
9	10/22	C	7	3	7	errors narrowing to one pattern
10	10/29	D	7	3	7	–
11	11/5	E	8	2	8	criterion met, 1 of 3
12	11/12	F	8	2	8	criterion met, 2 of 3

How to read the log

- ☐ Baseline was the median of three forms on three days: 2, 3, 3, so 3. Not the average, not the best.
- ☐ The aim line runs from 3 in week 1 to 8 at the goal date. Probes 4, 5 and 6 (3, 2, 3) sat under it: three in a row, so the teaching changed and the change is written on the row.
- ☐ The notes name the pattern, not just the count: "answered both all items and one none item correctly, called the other none item some, missed all three some items by saying most, and got one of the three most items right" is

PROGRESS MONITORING How This Pack Works

Goal, baseline, weekly probe, graph, decision. Six steps, one skill.

A progress monitoring goal needs a thing to count and a page to count it on. This file is both, for one skill: a goal written in the probe's own words, 6 equivalent forms of the probe that measures it, and a graph scaled to it. Nothing has to be built or found.

1. **Baseline.** Give Forms A, B and C on three different days. The middle score of the three is the baseline; write it on the goal page.
2. **Write the goal** from the six-part frame on the goal page. Start from the sample and change every bracket: the date, the condition, the criterion, the number of probes.
3. **Probe once a week** with the forms in rotation (A, B, C, D, E, F, A…). Never the same form two weeks running. Every form is ten items, untimed. Score it against the answer key (pages 16–17).
4. **Log and plot** the score the same day. Draw the aim line first, from the baseline on the left to the criterion at the goal date on the right, then plot each week's dot.
5. **Decide from the graph.** Three dots in a row under the aim line: change the teaching this week and write the change on the log. Three in a row over it: raise the target.
6. **Report from the log.** The log gives the progress report its numbers: baseline, the last two scores, and what the errors keep landing on.

The weekly routine, about five minutes

- ☐ Monday: pull the next form in the rotation (A, B, C, D, E, F, A…).
- ☐ Any day: give the probe one-to-one, untimed; ten items takes a few minutes.
- ☐ Same day: score it, log the row, plot the point, look at the last three points.
- ☐ Friday: if three points sit under the aim line, write the change you are making on the log.

Print and prep

- ☐ Print one copy per student per week: the student writes on the form and that same sheet is the one you score.
- ☐ The forms are student sheets with nothing on them but the problems. The answer key and the Correct ___ / 10 box for every form are on pages 16 and 17; score there, then log it.
- ☐ Keep the goal page and the graph page for each student at the front of the data folder; type into them or write on them.
- ☐ The caseload page is one grid for every student on this goal: print it once a month.

BRIGHT PATH SPED

PROGRESS MONITORING

How This Pack Works

Goal, baseline, weekly probe, graph, decision. Six steps, one skill.

A progress monitoring goal needs a thing to count and a page to count it on. This file is both, for one skill: a goal written in the probe's own words, 6 equivalent forms of the probe that measures it, and a graph scaled to it. Nothing has to be built or found.

1. **Baseline.** Give Forms A, B and C on three different days. The middle score of the three is the baseline; write it on the goal page.
2. **Write the goal** from the six-part frame on the goal page. Start from the sample and change every bracket: the date, the condition, the criterion, the number of probes.
3. **Probe once a week** with the forms in rotation (A, B, C, D, E, F, A...). Never the same form two weeks running. Every form is ten items, untimed. Score it against the answer key (pages 16–17).
4. **Log and plot** the score the same day. Draw the aim line first, from the baseline on the left to the criterion at the goal date on the right, then plot each week's dot.
5. **Decide from the graph.** Three dots in a row under the aim line: change the teaching this week and write the change on the log. Three in a row over it: raise the target.
6. **Report from the log.** The log gives the progress report its numbers: baseline, the last two scores, and what the errors keep landing on.

The weekly routine, about five minutes

- [ ] Monday: pull the next form in the rotation (A, B, C, D, E, F, A...).
- [ ] Any day: give the probe one-to-one, untimed; ten items takes a few minutes.
- [ ] Same day: score it, log the row, plot the point, look at the last three points.
- [ ] Friday: if three points sit under the aim line, write the change you are making on the log.

Print and prep

- [ ] Print one copy per student per week: the student writes on the form and that same sheet is the one you score.
- [ ] The forms are student sheets with nothing on them but the problems. The answer key and the Correct ___ / 10 box for every form are on pages 16 and 17; score there, then log it.
- [ ] Keep the goal page and the graph page for each student at the front of the data folder; type into them or write on them.
- [ ] The caseload page is one grid for every student on this goal: print it once a month.

What this probe is not

It is not a norm-referenced test and it carries no benchmark score. The sample goal uses invented criteria in brackets; your team sets the real ones from the baseline and the student's IEP. Every form is untimed and ten items long, so a score of 8 means the same thing on every form, and a student is never scored on speed.

Equivalent forms, and why it matters

Every form has ten items drawn the same way, from one shuffle of the same bank, and no item appears on two forms — 60 different items across the six forms. A score on one form means the same as a score on another, so the line on the graph is the student, not the paper. Rotate the forms and the page cannot be memorized.

Benchmarks toward the goal

BENCHMARK	TARGET DATE	TARGET SCORE	ACTUAL SCORE	MET?

Giving and scoring the probe

- [ ] Say: “Read the item. Decide which word is correct and write it in the box.”
- [ ] Correct: the exact word on the key — all, none, some or most.
- [ ] The same mix every form — two all, two none, three some, three most — so a missed item names which kind of quantifier judgment tripped the student up.
- [ ] Untimed. Let the student finish all ten.

Scoring rules for this student (accepted answers, reversals, supports allowed)

What the errors say to reteach (carry over from the log)

EXAMPLE A Filled-In Data Log (Invented Student)

Gus is invented. Twelve weekly probes on quantifier basic concepts, the aim line, the change that three low points forced, and the criterion being met.

The goal, as written for Gus, 2nd grade (invented)

By May 20, when given 10 items naming all, none, or part of a set, Gus will write the correct quantifier word for 8 of 10 items on 3 consecutive weekly probes, as measured by teacher-scored quantifier concept probes (forms A–F).

#	DATE	FORM	CORRECT	ERRORS	GRAPHED	NOTES
1	9/8	A	2	8	2	baseline
2	9/9	B	3	7	3	baseline
3	9/10	C	3	7	3	baseline (median of 2, 3, 3 = 3)
4	9/17	D	3	7	3	answered both all items and one none item correctly, called the other none item some, missed all three some items by saying most, and got one of the three most items right
5	9/24	E	2	8	2	same pattern
6	10/1	F	3	7	3	3 under aim line: practiced sorting a set into two colors and naming the bigger group first, before asking about the smaller group
7	10/8	A	5	5	5	–
8	10/15	B	6	4	6	–
9	10/22	C	7	3	7	errors narrowing to one pattern
10	10/29	D	7	3	7	–
11	11/5	E	8	2	8	criterion met, 1 of 3
12	11/12	F	8	2	8	criterion met, 2 of 3

How to read the log

- [ ] Baseline was the median of three forms on three days: 2, 3, 3, so 3. Not the average, not the best.
- [ ] The aim line runs from 3 in week 1 to 8 at the goal date. Probes 4, 5 and 6 (3, 2, 3) sat under it: three in a row, so the teaching changed and the change is written on the row.
- [ ] The notes name the pattern, not just the count: “answered both all items and one none item correctly, called the other none item some, missed all three some items by saying most, and got one of the three most items right” is what sent the teaching somewhere specific, and a score on its own would not have said that.
- [ ] Criterion met on probes 11 and 12; one more consecutive probe at 8 or better and the goal is met.

The progress report sentence this log produces

“On weekly quantifier basic concepts probes (10 items, untimed), Gus scored 3 of 10 at baseline in September and 8 of 10 on each of the two most recent probes in November. Progress is sufficient to meet the goal of 8 of 10 on three consecutive probes by May.” Every number in it is on the log above; nothing is from memory.
