

SKIP COUNTING BY 5S

One skill, start to finish: the IEP goal, six probe forms, the graph. Untimed. Fillable PDF.

SKIP COUNT 5S Skip Counting by 5s – Goal and Directions

Goal, baseline, directions and benchmarks for one skill. Untimed; score is missing numbers written correctly out of 10.

Ten runs of four numbers counting by fives, one number missing from each, the blank anywhere in the four at random.

Sample goal — invented; edit every bracket to fit the student

By [annual review date], when given 10 skip-counting sequences by 5s with one number missing, [Student] will write [8 of 10] missing numbers correctly on [3] consecutive weekly probes, as measured by teacher-scored skip counting probes.

BY (DATE) CRITERION (SCORE OUT OF 10, OR PERCENT)

GIVEN (CONDITION: WHAT IS SHOWN, ANY ALLOWED SUPPORTS) ON ____ OF ____ CONSECUTIVE PROBES

STUDENT WILL (THE BEHAVIOR, IN THE WORDS OF THE PROBE) AS MEASURED BY (THIS PROBE: SKIP COUNTING 5S, FORMS A-F, PAGE 5-10)

Baseline: give Forms A, B and C on three days and take the middle score

BASILINE PROBE 1	BASILINE PROBE 2	BASILINE PROBE 3	MEDIAN (THE BASILINE)

Benchmarks toward the goal

BENCHMARK	TARGET DATE	TARGET SCORE	ACTUAL SCORE	MET?

Giving and scoring the probe

- ☐ Say, "Each row counts by fives. One number is missing. Write it in the box."
- ☐ Correct the right numeral, legible, in the box.
- ☐ Note whether the student can count by fives from any number or only from zero. The Mark in the first position is about consecutive starts from.

SKIP COUNT 5S Skip Counting by 5s – Form A

Write the missing number in each box. Untimed.

NAME _____ DATE _____ FORM A untimed - 10 items

IEP GOAL THIS PROBE MEASURES

Example: By [annual review date], when given 10 skip-counting sequences by 5s with one number missing, [Student] will write [8 of 10] missing numbers correctly on [3] consecutive weekly probes, as measured by teacher-scored skip-counting probes.

GOAL AS WRITTEN FOR THIS STUDENT (TYPE IT ONCE, THEN PRINT THE FORM)

140 145 150	90 95 100
10 15 25	110 120 125
20 30 35	65 70 75
120 125 130	55 60 65
40 50 55	15 20 30

SKIP COUNT 5S Skip Counting by 5s – Data Log and Graph

One row per probe. Three points in a row under the aim line is a decision, not a feeling change the teaching and write what changed in the notes.

STUDENT _____ CRITERION / AIM _____ GOAL DATE _____

CORRECT OUT OF 10 - DRAW THE AIM LINE FROM THE BASELINE TO THE CRITERION FIRST, THEN PLOT EACH WEEK

#	DATE	FORM	CORRECT	ERRORS	SCORE USED ON GRAPH	NOTES (CONDITIONS, WHAT WAS RETEACHING)

SKIP COUNT 5S Skip Counting by 5s – Caseload Summary

Every student on this goal, on one grid. Twelve rows, eight probes, one decision column.

TEACHER / CASE MANAGER _____ SKILL (AS THE GOAL WORDS IT) _____ MARKING PERIOD _____

STUDENT	BASILINE	CRITERION	P1	P2	P3	P4	P5	P6	P7	P8	TREND	DECISION THIS MONTH

How to fill it

- ☐ One row per student who has a goal on this skill. Baseline is the median of the first three probes.
- ☐ One column per weekly probe: write the score out

What it is for

Grouping: When six students sit on the same goal, the individual graphs answer "how is this child doing" and nothing answers "who needs the same

EXAMPLE A Filled-In Data Log (Invented Student)

Bruno is invented. Twelve weekly probes on skip counting by 5s, the aim line, the change that three low points forced, and the criterion being met.

The goal, as written for Bruno, second grade (invented)

By May 20, when given 10 skip-counting sequences by 5s with one number missing, Bruno will write 8 of 10 missing numbers correctly on 3 consecutive weekly probes, as measured by teacher-scored skip counting probes (forms A-F).

#	DATE	FORM	CORRECT	ERRORS	GRAPHED	NOTES
1	9/8	A	5	5	5	baseline
2	9/9	B	4	6	4	baseline
3	9/10	C	5	5	5	baseline (median of 5, 4, 5 = 5)
4	9/17	D	5	5	5	five from zero, lost from any other start
5	9/24	E	5	5	5	same pattern
6	10/1	F	4	6	4	3 under aim line: started runs at 15 and 35 in practice, not at 0
7	10/8	A	6	4	6	—
8	10/15	B	7	3	7	—
9	10/22	C	7	3	7	errors narrowing to one pattern
10	10/29	D	7	3	7	—
11	11/5	E	8	2	8	criterion met, 1 of 3
12	11/12	F	8	2	8	criterion met, 2 of 3

How to read the log

- ☐ Baseline was the median of three forms on three days: 5, 4, 5, so 5. Not the average, not the best.
- ☐ The aim line runs from 5 in week 1 to 8 at the goal date. Probes 4, 5 and 6 (5, 5, 4) sat under it three in a row, so the teaching changed and the change is written on the row.
- ☐ The changes name the pattern, not just the count: "five from zero, lost from any other start" is what sent the teaching somewhere specific, and a score on its own would not have said that.

PROGRESS MONITORING How This Pack Works

Goal, baseline, weekly probe, graph, decision. Six steps, one skill.

A progress monitoring goal needs a thing to count and a page to count it on. This file is both, for one skill: a goal written in the probe's own words, 6 equivalent forms of the probe that measures it, and a graph scaled to it. Nothing has to be built or found.

- Baseline.** Give Forms A, B and C on three different days. The middle score of the three is the baseline; write it on the goal page.
- Write the goal** from the six-part frame on the goal page. Start from the sample and change every bracket: the date, the condition, the criterion, the number of probes.
- Probe once a week** with the forms in rotation [A, B, C, D, E, F, A, ...]. Never the same form two weeks running. Every form is ten items, untimed.
- Log and plot** the score the same day. Draw the aim line first, from the baseline on the left to the criterion at the goal date on the right, then plot each week's dot.
- Decide from the graph.** Three dots in a row under the aim line: change the teaching this week and write the change on the log. Three in a row over it: raise the target.
- Report from the log.** The log gives the progress report its numbers: baseline, the last two scores, and what the errors keep landing on.

The weekly routine, about five minutes

- ☐ Monday: pull the next form in the rotation [A, B, C, D, E, F, A, ...].
- ☐ Any day: give the probe one-to-one, untimed; ten items takes a few minutes.
- ☐ Same day: score it, log the row, plot the point, look at the last three points.
- ☐ Friday: if three points sit under the aim line, write the change you are making on the log.

Print and prep

- ☐ Print one copy per student per week: the student writes on the form and that same sheet is the one you score.
- ☐ The teacher copy is the one you mark on; the student copy stays clean.
- ☐ Keep the goal page and the graph page for each student at the front of the data folder; type into them or write on them.
- ☐ The caseload page is one grid for every student on this goal; print it once a month.

What this probe is not

It is not a norm-referenced test and it carries no benchmark score. The sample goal uses invented criteria in brackets; your team sets the real ones from the baseline and the student's IEP. Every form is untimed and ten items long, so a score of 8 means the same thing on every form, and a student is never scored on speed.

Equivalent forms, and why it matters

Every form has ten items drawn the same way, with no item repeated inside a form and no two forms alike. Forms are drawn independently, so an item can recur across the set — on a fact probe that is the point, because the facts themselves are the fixed set being learned. A score on one form means the same as a score on another, so the line on the graph is the student, not the paper. Rotate the forms and the page cannot be memorized.

Skip Counting by 5s – Goal and Directions

Goal, baseline, directions and benchmarks for one skill. Untimed; score is missing numbers written correctly out of 10.

Ten runs of four numbers counting by fives, one number missing from each, the blank anywhere in the four at random.

#	DATE	FORM	CORRECT	ERRORS	SCORE USED ON GRAPH	NOTES (CONDITIONS, WHAT WAS RETEACHING)

Skip Counting by 5s – Caseload Summary

Every student on this goal, on one grid. Twelve rows, eight probes, one decision column.

TEACHER / CASE MANAGER

SKILL (AS THE GOAL WORDS IT)

MARKING PERIOD

STUDENT	BASELINE	CRITERION	P1	P2	P3	P4	P5	P6	P7	P8	TREND	DECISION THIS MONTH

How to fill it

- ☐ One row per student who has a goal on this skill. Baseline is the median of the first three probes.
- ☐ One column per weekly probe; write the score out of 10, not a percent, so the rows compare.
- ☐ Trend: up, flat or down over the last four probes. That word, not the last score, is what the decision follows.
- ☐ Decision: keep going, change the teaching, or raise the target. A blank decision on a flat row is the thing this page exists to catch.

What it is for

Grouping. When six students sit on the same goal, the individual graphs answer “how is this child doing” and nothing answers “who needs the same fifteen minutes.” Rows that are flat together are a group; a row that is flat alone is a different question. Take this page to the data meeting instead of ten folders.

EXAMPLE

A Filled-In Data Log (Invented Student)

Bruno is invented. Twelve weekly probes on skip counting by 5s, the aim line, the change that three low points forced, and the criterion being met.

The goal, as written for Bruno, second grade (invented)

By May 20, when given 10 skip-counting sequences by 5s with one number missing, Bruno will write 8 of 10 missing numbers correctly on 3 consecutive weekly probes, as measured by teacher-scored skip counting probes (forms A–F).

#	DATE	FORM	CORRECT	ERRORS	GRAPHED	NOTES
1	9/8	A	5	5	5	baseline
2	9/9	B	4	6	4	baseline
3	9/10	C	5	5	5	baseline (median of 5, 4, 5 = 5)
4	9/17	D	5	5	5	fine from zero, lost from any other start
5	9/24	E	5	5	5	same pattern
6	10/1	F	4	6	4	3 under aim line: started runs at 15 and 35 in practice, not at 0
7	10/8	A	6	4	6	–
8	10/15	B	7	3	7	–
9	10/22	C	7	3	7	errors narrowing to one pattern
10	10/29	D	7	3	7	–
11	11/5	E	8	2	8	criterion met, 1 of 3
12	11/12	F	8	2	8	criterion met, 2 of 3

How to read the log

- ☐ Baseline was the median of three forms on three days: 5, 4, 5, so 5. Not the average, not the best.
- ☐ The aim line runs from 5 in week 1 to 8 at the goal date. Probes 4, 5 and 6 (5, 5, 4) sat under it: three in a row, so the teaching changed and the change is written on the row.
- ☐ The notes name the pattern, not just the count: “fine from zero, lost from any other start” is what sent the teaching somewhere specific, and a score on its own would not have said that.
- ☐ Criterion met on probes 11 and 12; one more consecutive probe at 8 or better and the goal is met.

The progress report sentence this log produces

“On weekly skip counting by 5s probes (10 items, untimed), Bruno scored 5 of 10 at baseline in September and 8 of 10 on each of the two most recent probes in November. Progress is sufficient to meet the goal of 8 of 10 on three consecutive probes by May.” Every number in it is on the log above; nothing is from memory.
