

Ten More Ten Less

HUNDRED CHART • CUT AND GLUE

33 pages • 8 page types • 162 answers

One complete kit for ten more and ten less within 100, on the hundred chart: read it, fill it, write it, fix it and cut and glue it — on pages with room to work, untimed.

THREE STEPS

- 1 **Read the chart together**
Page 6 is a whole hundred chart with one number ringed. Down one row is 10 more; up one row is 10 less. Read it aloud with the child, then let the child put a finger on a number and slide down.
- 2 **Hand over a page**
Every student page opens with a name line and one short instruction, and the boxes are big. Nothing on it is written for you, so the child can start. The chart below says which page for which child; the dots at the top right are the only level code.
- 3 **Check it, record it, send it home**
The answer keys are pages 23 and 24. Date each page on the tracker (page 25), roll a group up on page 26, and send the home page (28). A filled example is on page 29.

WHICH PAGE, WHEN

WHEN...	USE...
Meeting ten more and ten less for the first time	Read the Chart, page 6 · Chart Cross A, page 7
Needs the chart in front of them	Fill the Chart, pages 13, 14 · Chart Pieces, pages 15, 16
Ready to work without the chart	Write It, pages 10, 11, 12 · Chart Cross B and C, pages 8 and 9
Rushes and adds 1 instead of 10	Fix It, pages 17, 18
Better with cutting and gluing	Cut and Glue, pages 19, 20, 21
Ready to make their own	My Turn, page 22 · notes: page 27, phrase bank 30

Everything inside (33 pages)

- **17 student pages** in 8 page types: Read the Chart, Chart Cross, Write It, Fill the Chart, Chart Pieces, Fix It, Cut and Glue and My Turn
- **48 ten-more, ten-less questions**, every start number different, all computed in code
- **18 cut-and-glue pieces** in 3 sets, **86 empty chart boxes** to fill in
- **1 number map, 2 answer keys, 1 tracker, 1 class grid**
- **1 team note, 1 home page, 1 filled example, 1 phrase and strategy bank**
- **1 binder cover, 6 divider tabs** and a spine label

What makes it different

The chart is on the page until the child no longer needs it: Fill the Chart and Chart Pieces keep it, Chart Cross keeps one column of it, and Write It takes it away. You can see which step a child is on. Nothing is timed and nothing on a student page is scored. The number map (page 5) shows every start number and which page it lives on.

How to fill this in

Write how many answers the child got right with no prompt, and the date. A blank means not tried yet, never wrong. There are 162 answers on the 15 pages above; Read the Chart (page 6) and My Turn (page 22) are not scored. Answer keys: pages 23 and 24. Filled example: page 29.

THIS MONTH WE ARE WORKING ON (YOUR OWN WORDING)

Marcus T. is invented; nothing on this page describes a real student. The blank tracker is on page 25.

How to read it

Marcus T. has done **8 of 15** scored pages and got **71 of 77** answers right with no prompt. **4** pages were all right. Every number here comes from the table above.

The family note this tracker would produce

“This month Marcus finished 8 pages of ten more, ten less and got 71 of 77 answers right. He went along the row instead of down once on the chart crosses; more time with the chart in front of him is next.” — every fact in it is a row of the table above.

THANK YOU FOR USING THIS RESOURCE

Everything here was built for the teacher who has a table of children who each need a different amount of support with ten more and ten less. If this helped, leaving feedback on TPT helps other teachers find it.
