Thanksgiving-table logic for kindergarten through 2nd grade: who sat where, who brought what, which one does not belong, and what comes next. No clip art; the reading is short clue sentences.

THREE STEPS

1 Start with the learn-how page

Page 6 shows a solved seat puzzle, then a puzzle to try. Read it aloud with the child once. Every puzzle after it works the same way: read a clue, find the seat or the box, write.

2 Pick a page for each child

Pages go from easier to harder, marked with dots (one dot is the starting page, three dots asks for more). Use the chart below. Cut-and-paste pages need scissors and glue; the rest need a pencil.

3 Check it, record it, send it home

Every answer is on pages 26–27. Date each page on the tracker (page 28), roll the group up on page 29 and send the home page (31). A filled example is on page 32.

WHICH PAGE, WHEN

WHEN...	USE...
Learning how a logic puzzle works	Page 6, then Who Sat Where, pages 7–9
Reasoning about people and things	Who Brought What, pages 10–12
Sorting by what is the same	Odd One Out, pages 13–15 · Does Not Belong, pages 16–18
Spotting what repeats	What Comes Next, pages 19–21
Scissors and glue today	Cut and Paste, pages 22–23
A child who is ready to make one	Make Your Own, pages 24–25
Writing a progress note or a note home	Team note, page 30 · phrase bank, page 33

Everything inside (36 pages)

- 20 student pages in 7 formats, 58 puzzles, every one with exactly one answer
- 14 seat puzzles (3 and 4 seats, 3 clues each), 5 dish grids (3 by 3, then 4 by 4)
- 13 odd-one-out word sets, 14 shape sets, 12 pattern puzzles
- 2 cut-and-paste pages (14 name tiles) and 2 make-your-own pages
- 2 answer-key pages, a tracker, a class grid, a team note, a home page, a filled example, a phrase bank
- 1 binder cover, 6 divider tabs, a spine label

One answer each

Every puzzle was checked by a program to have exactly one answer, and removing any one clue from a seat or dish puzzle leaves more than one. The answer key (pages 26–27) is printed from that same check, so the key and the puzzle cannot disagree.

Checking a seat puzzle

If a child's answer is different, do not tell the answer. Read the clues one at a time and point to the seat each one tests. The clue that comes out untrue is the one to talk about.

Make Your Own, pages 24–25

No single key: the child writes the puzzle. Solve it yourself, or have another child solve it, and count the answers. One answer means the clues work.

Dev M. is invented; nothing on this page describes a real student. The blank tracker is on page 28.

How to read it

Dev M. has finished **10 of 20** pages: **7** alone and **3** with help. Sat Where 3 of 4, Brought What 2 of 3, Odd One Out 2 of 3, Does Not Belong 1 of 3, Comes Next 2 of 3, Cut and Paste 0 of 2, Make Your Own 0 of 2. Every number comes from the table above.

The family note this tracker would produce

“This month Dev M. finished 10 logic pages, 7 of them on his own. He counted by 5s without help and needed the left and right words for one seat puzzle.” — every fact in it is a row of the table above.

THANK YOU FOR USING THIS RESOURCE

Everything here was built for the teacher who wants a table of children reasoning with clues, spotting what does not belong and finding what comes next. If this helped, leaving feedback on TPT helps other teachers find it.

Something missing or wrong?

Please use the **Ask a Question** tab on the product page first — every question is read, and a fix to the file is a free update you re-download from **My Purchases**.
