HOW IT WORKS

HOW TO POST, HUNT AND RECORD

THE PARTS OF A PAGE

The clue cards
Eight cards a page, edge to edge, with dashed lines. Cut across the page, then down. The number in the corner is the clue number, the same as the row on the recording sheets.

The writing line
A line with a dashed middle, half an inch tall, for a child's handwriting. Click to type, or print and write.

The picture choices
Three big pictures with their words. The child circles one with a pencil.

The picture
Every picture is drawn for this set, with no faces and no clothing.

THE 6 PAGE TYPES

PAGE TYPE	WHAT IT IS
Clue cards	16 cards to cut and post: Clues 1-15 and an END card; each says which clue to find next
Circle It	read the clue, circle the picture of the answer from three choices (Level 1)
Write It	read the clue, write the answer on a writing line (Level 2)
Find It	find 8 things in your own room and check them off
Write a Riddle	write a riddle for a friend and draw the answer
Word Bank	the 15 answer pictures with their words

The dots at the top right
One dot: starting (circle the picture). Two dots: building (write the answer, find it in the room, the word bank). Three dots: ready for more (write your own riddle). Dots, not words, so children do not compare pages.

Room to work
Picture choices are about an inch tall, writing lines are half an inch tall and every sheet has a big name line. If a child needs more room, hand over one sheet at a time.

Printing and the type-in fields
Every page prints clean in black and white. The name line, writing lines and check boxes are type-in fields in any PDF reader: click one, type, then save. The cards are always printed. This is a fillable PDF, not a slideshow or a word-processor file.

Where to post them
This is a classroom hunt: post the cards on walls, doors and the sides of shelves, where children can see each picture. Keep the chain out of order around the room, or put it in a loop that ends where it starts. A small group can also spread the cards on a table.

How to use the key

Clue **k** is the card with the number **k** in its corner, and its answer is the picture in the table. Row **k** on the Circle It and Write It sheets (pages 8-9, 10-11) is the same clue: the child circles or writes that answer. Each card ends with the number of the card to find next, and the last clue sends children to the END card, 16 cards in all. Letters in the 15 answer words: 71. Find It (page 12) has no single right answer: it is whatever is in your room.

CLASS GRID

CLASS PROGRESS GRID

CLASS OR GROUP

MONTH

STUDENT	CIRCLE IT (OF 15)	WRITE IT (OF 15)	FIND IT (OF 8)

PREVIEW

How to fill this in

For each child, write how many items are right with no prompt in each column (add up the tracker rows). One look across a row shows which kind of sheet is easy and which is next.

Grouping for small-group time

Children who circle most of the Circle It pictures can move to Write It. Children who are still working on Circle It can read the clues with a partner and use the word bank (page 5).

EXAMPLE PRIYA'S TRACKER

Priya S. is invented; nothing on this page describes a real student. The blank tracker is on page 15.

STUDENT **Priya S. (an invented student)**

TEACHER **Mr. Okafor (invented)**

MONTH **November**

PAGE	SHEET	ITEMS	RIGHT	DATE	NOTES
8	Circle It 1-8	8	8	11/9	–
9	Circle It 9-15	7	6	11/10	Clue 14 read aloud first
10	Write It 1-8	8	5	11/12	Used the word bank for 3
11	Write It 9-15	7	–	–	–
12	Find It in Our Room	8	8	11/13	–

How to read it

Priya S. has done **4 of 5** sheets and got **27 of 31** items right with no prompt. **2** sheets were all right. Every number here comes from the table above.

The team note this tracker would produce

"This month Priya got 27 of 31 items right on 4 scavenger hunt sheets. Next we are trying the Write It sheet again, with the word bank on the desk." — every number in it is a row of the table above.

What the table points to

Every sheet with a note is short of full: Circle It 9-15, Write It 1-8. Sheets left blank (1 of 5) are not tried yet, never wrong.

A riddle from the Write a Riddle page (invented)

"I am yellow. I grow on a stalk. What am I?" The answer line says **corn**. This is Priya's own riddle, counted as written because it has a clue and an answer. Your own class checklist decides what else to look for.
